(English below)

79. CESG

- ADJUSTMENT_CODE: necesario aperturar por los diferentes códigos de ajuste
- Modificaciones en anclaje:
    - Bajar a nivel Sub Main Category 1 para Tangible Assets – Real estate
    - Eliminar sector Other financial corporations para Equity instruments
    - Eliminar baremos "Other colateral real" y "No colateral real" (dimensión Collateral) para los sectores Households y Other financial corporations
    - Incluir Sectores General governments, Central banks y Credit institutions solamente con Collateral Residencial y Commercial
- Modificaciones sobre dimensiones:
    - Dimensiones CNAEL y NACE Code ESG sólo deben cruzar con Sector Non financial corporations
    - Nueva codificación de dimensión NACE Code ESG
    - Crear nueva dimensión PERFORMING ESG, para asegurar anclaje contra DGPCP
    - Incluir dimensión European Union (EU Area, Non EU Area)
    - Convertir Chronic changes y Acute Changes en dimensiones estructurales (antes dimensiones regulares)
    - Dimensiones Paris excluded y Environmentally sustainable = N/A para sectores Households, General governments, Other financial corporations, Central banks y Credit institutions
    - Maturity ESG para Equity y Tangible Assets – Real estate sólo debe cruzar con baremo > 20 years
    - Maturity ESG = N/A para Type of value = TYVA02 y para Fair Value Detail = FVAD2
- Modificaciones sobre métricas:
    - Average maturity = N/A para Adjudicados y Equity
    - Average maturity = N/A para Maturity ESG = MESG5 y MESG6
    - Average maturity = N/A para Type of value = TYVA02 y para Fair Value Detail = FVAD2
- Incluidas nuevas validaciones

80. ENPC

- ADJUSTMENT_CODE: necesario aperturar por los diferentes códigos de ajuste
- Modificación en anclaje:
    - Bajar a nivel Sub Main Category 1 para Tangible Assets – Real estate
    - Incluir dimensión Fair value detail para traer solo el Gross (Fair Value Gross)
    - Incluir dimensión Sector con todos los baremos
- Modificaciones sobre dimensiones:
    - Dimensión European Union convertida en Estructural
    - Modificación en relación EP Score Data (Real) con EPC Label Data (Real)
- Incluidas nuevas validaciones

83. Mitigation actions

- ADJUSTMENT_CODE: necesario aperturar por los diferentes códigos de ajuste
- Modificaciones en anclaje:
    - Añadir dimensión Accounting_portfolio
- Modificaciones sobre dimensión Funding type:
    - Modificar nombre de baremo Sustainability Linked Loans (SLL) à Sustainability Linked Instruments de la dimensión
    - Añadir un nuevo baremo en la dimensión Fundying Type: Pure Green counterparties (FUTY6) que cruzará con el Sector Non financial Corporations
    - Permitir la selección de Households con las categoría Agriculture, forestry and livestock, Water and Waste Management y Biodiversity and conservation projects
- Incluidas nuevas validaciones

84. GAR & BTAR

- ADJUSTMENT_CODE: necesario aperturar por los diferentes códigos de ajuste
- Modificaciones en anclaje
    - Bajar a nivel Sub Main Category 1 para Tangible Assets – Real estate
- Modificaciones sobre dimensiones
    - Dimensión European Union convertida en Estructural
    - Añadir nuevas dimensiones (sólo cruzarán con Specific purpose)
        - Specific eligible
        - Specific sustainable
    - Dimensión Purpose ESG
        - Modificar nombre de baremo Other Households purpose -> Other purpose
        - Cruzar baremos Building renovation loans (PESG1) y Other purpose (PESG3) con el Sector Non financial corporations
    - Originated during period permitir cruce siempre
- Modificaciones sobre métricas
    - Eliminar las métricas específicas (Amount using Capex (CCM), Amount using Turnover (CCM), Amount using Capex (CCA), Amount using Turnover (CCA))
    - Añadir las siguientes métricas (solo cruzarán con General purpose):
        - Taxonomy-eligible Turnover CCM
        - Taxonomy-aligned Turnover CCM Pure
        - Taxonomy -aligned Turnover CCM Transitional
        - Taxonomy -aligned Turnover CCM Enabling
        - Taxonomy-eligible Turnover CCA
        - Taxonomy -aligned Turnover CCA Adaptation
        - Taxonomy -aligned Turnover CCA Enabling
        - Taxonomy-eligible Capex CCM
        - Taxonomy -aligned Capex CCM Pure
        - Taxonomy -aligned Capex CCM Transitional
        - Taxonomy -aligned Capex CCM Enabling
        - Taxonomy-eligible Capex CCA
        - Taxonomy -aligned Capex CCA Adaptation
        - Taxonomy -aligned Capex CCA Enabling
- Incluidas nuevas validaciones

93. GHGE

- ADJUSTMENT_CODE: necesario aperturar por los diferentes códigos de ajuste
- Modificaciones en anclaje
  - Incluir la Main Category en el anclaje (Loans, Debt securities, Equity)
  - Incluir Sector → Non financial corporations
  - Eliminar AMOUNT y convertirlo en Satélite tipo Stock-metric
  - Incluir dimensión Fair value detail para traer solo el Gross (Fair Value Gross)
- Modificaciones en dimensiones:
  - Incluir dimensión European Union (EU Area, Non EU Area)
  - Nueva codificación de dimensión NACE Code ESG
  - Añadir dimensión de Enfoque de cálculo (Corporates, Auto, Project, CRE) →

79. CESG

- ADJUSTMENT_CODE: to be opened for the different adjustment codes.
- Modifications in anchor:
    - Downgrade to Sub Main Category 1 level for Tangible Assets - Real estate
    - Remove sector Other financial corporations for Equity instruments
    - Remove "Other real collateral" and "No real collateral" (Collateral dimension) for the sectors: Households and Other financial corporations.
    - Include General governments, Central banks and Credit institutions sectors only with Collateral Residential and Commercial.
- Modifications on dimensions:
    - CNAEL and NACE Code ESG dimensions should only cross with the Sector Non financial corporations.
    - New coding of NACE Code ESG dimension
    - Create new dimension PERFORMING ESG, to ensure the anchoring against DGPCP
    - Include European Union dimension (EU Area, Non EU Area)
    - Convert Chronic changes and Acute Changes into structural dimensions (formerly regular dimensions)
    - Paris excluded and Environmentally sustainable dimensions = N/A for sectors Households, General governments, Other financial corporations, Central banks and Credit institutions
    - Maturity ESG for Equity and Tangible Assets - Real estate should only be crossed over with scale > 20 years
    - Maturity ESG = N/A for Type of value = TYVA02 and for Fair Value Detail = FVAD2
- Modifications on metrics:
    - Average maturity = N/A for Awarded and Equity
    - Average maturity = N/A for Maturity ESG = MESG5 and MESG6
    - Average maturity = N/A for Type of value = TYVA02 and for Fair Value Detail = FVAD2
- New validations included

80. ENPC

- ADJUSTMENT_CODE: need to be open for different adjustment codes.
- Modification in anchor:
    - Downgrade to Sub Main Category 1 level for Tangible Assets - Real estate
    - Include Fair value detail dimension to bring only Gross (Fair Value Gross)
    - Include Sector dimension with all scales.
- Modifications on dimensions:
    - European Union dimension converted into Structural dimension
    - Modification in relation with EP Score Data (Real) and EPC Label Data (Real)
- New validations included

83. Mitigation actions

- ADJUSTMENT_CODE: need to be open for different adjustment codes.
- Modifications in anchor:
    - Add Accounting_portfolio dimension.
- Modifications on Funding type dimension:
    - Modify the name of the scale Sustainability Linked Loans (SLL) à Sustainability Linked Instruments of the dimension.
    - Add a new scale in the Fundying Type dimension: Pure Green counterparties (FUTY6) that will cross with the Non financial Corporations Sector.
    - Allow the selection of Households with the categories Agriculture, forestry and livestock, Water and Waste Management and Biodiversity and conservation projects.
- Including new validations

84. GAR & BTAR

- ADJUSTMENT_CODE: need to be open by different adjustment codes
- Modifications in anchoring
    - Downgrade to Sub Main Category 1 level for Tangible Assets - Real estate
- Modifications on dimensions
    - European Union Dimension converted to Structural
    - Add new dimensions (will only cross with Specific purpose)
        - Specific eligible
        - Specific sustainable
    - ESG Purpose Dimension
        - Modify scale name Other Households purpose -> Other purpose
        - Cross over Building renovation loans (PESG1) and Other purpose (PESG3) scales with Sector Non financial corporations
    - Originated during period always allow crossover
- Modifications on metrics
    - Remove specific metrics (Amount using Capex (CCM), Amount using Turnover (CCM), Amount using Capex (CCA), Amount using Turnover (CCA))
    - Add the following metrics (will only cross over with General purpose):
        - Taxonomy-eligible Turnover CCM
        - Taxonomy-aligned Turnover CCM Pure
        - Taxonomy -aligned Turnover CCM Transitional
        - Taxonomy -aligned Turnover CCM Enabling
        - Taxonomy-eligible Turnover CCA
        - Taxonomy -aligned Turnover CCA Adaptation
        - Taxonomy -aligned Turnover CCA Enabling
        - Taxonomy-eligible Capex CCM
        - Taxonomy -aligned Capex CCM Pure
        - Taxonomy -aligned Capex CCM Transitional
        - Taxonomy -aligned Capex CCM Enabling
        - Taxonomy-eligible Capex CCA
        - Taxonomy -aligned Capex CCA Adaptation
        - Taxonomy -aligned Capex CCA Enabling
        -
- New validations included

93. GHGE

- ADJUSTMENT_CODE: need to be open for the different adjustment codes.
- Modifications in anchoring
    - Include Main Category in the anchor (Loans, Debt securities, Equity)
    - Include Sector → Non financial corporations

    - Eliminate AMOUNT and convert it to Satellite type Stock-metric
    - Include Fair value detail dimension to bring only the Gross (Fair Value Gross).
- Modifications in dimensions:
    - Include European Union dimension (EU Area, Non EU Area)
    - New dimension codification NACE Code ESG
    - Add dimension of Calculation approach (Corporates, Auto, Project, CRE) →
